CODE PRANETRA

AI-Powered Profile Scraper

Transforming Recruitment from Manual Sourcing to AI-Powered Candidate Discovery

AI-Powered | Recruitment | Automation | SaaS

⚠ Problem Statement

CODE PRANETRA

⏰ Time-Consuming Manual Search

Hours spent browsing LinkedIn, GitHub & StackOverflow for candidates

📋 Scattered Data Management

Candidate info spread across spreadsheets and disconnected tools

📧 Untracked Outreach

Inconsistent follow-ups and no visibility into campaign performance

🔗 No Unified Workflow

Sourcing, enrichment, and outreach handled in separate systems

The Solution

CODE PRANETRA

01

AI Job Parsing

Extracts roles, skills & industries from job descriptions automatically

02

Multi-Platform Search

Discovers profiles on LinkedIn, GitHub, StackOverflow & Wellfound

03

Profile Enrichment

AI-generated summaries + contact info via third-party providers

04

Centralized CRM

Organize candidates by company, job search, or shortlist

05

Automated Outreach

AI-drafted emails, bulk sending & automated follow-up campaigns

🚀 Impact & Results

CODE PRANETRA

10x

Faster Sourcing

Automated search replaces hours of manual browsing

↓ 90%

Manual Data Entry

AI enrichment eliminates repetitive copy-paste work

360°

Candidate Visibility

All profiles, searches & campaigns in one place

∞

Scalable Outreach

Bulk email + follow-ups without adding headcount
